CLOUD SUITE

THE DIGITAL ID

DIGITAL/VIRTUAL ID CARD

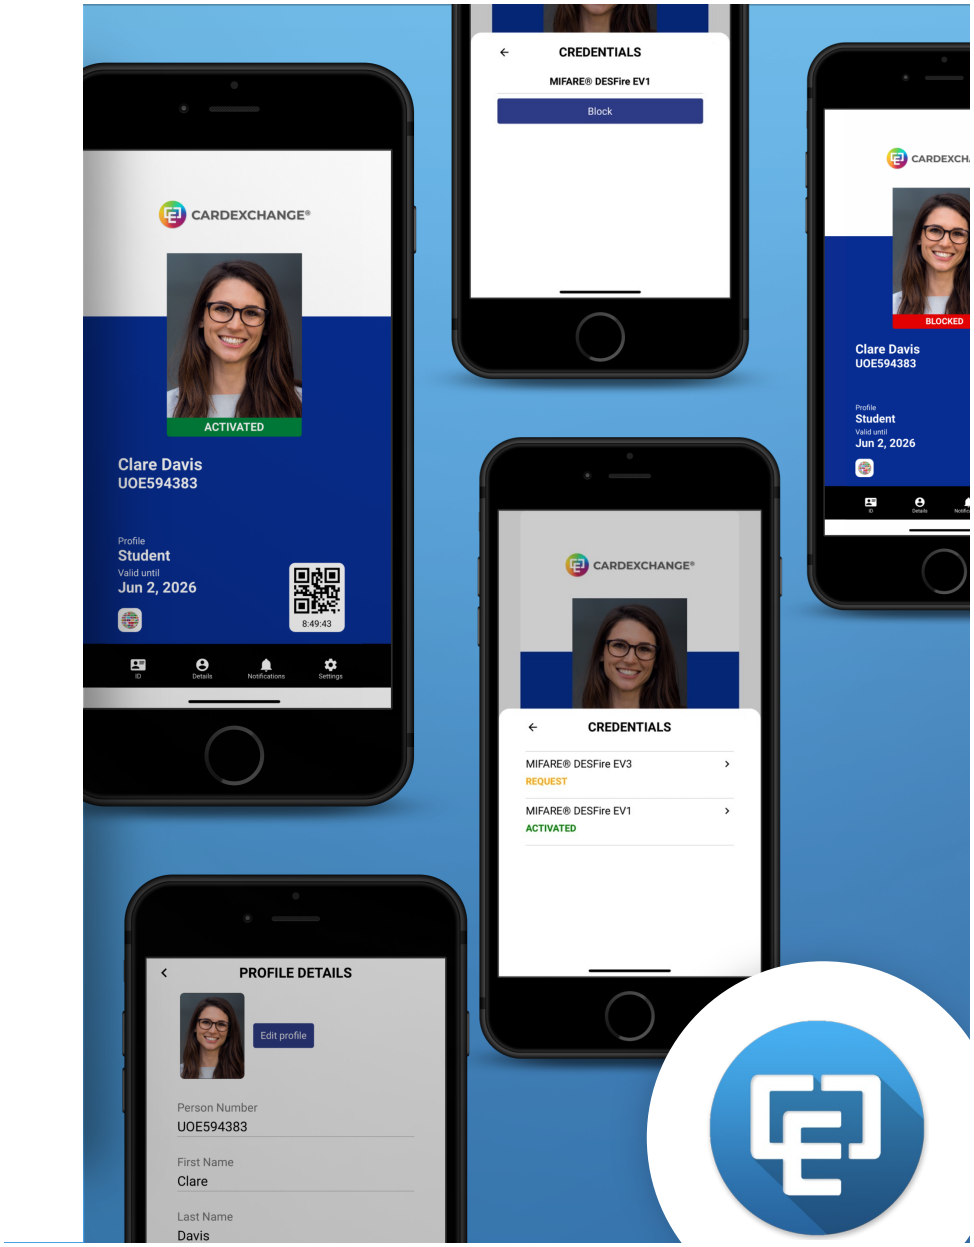
- Instant on-demand delivery of credential
- Environmentally friendly alternative to a printed card
- Live card status for added security
- Choose logo and colour schemes

SELF-SERVICE PHOTO UPLOAD

- Reduce physical contact with card holder
- Streamline photo capture process
- Save time and money compared to face-to-face enrolment
- Upload photo from anywhere, anytime
- Upload ID document for verification

NOTIFICATIONS

- Engage with the card holder
- Card delivery status updates
- Broadcast messages

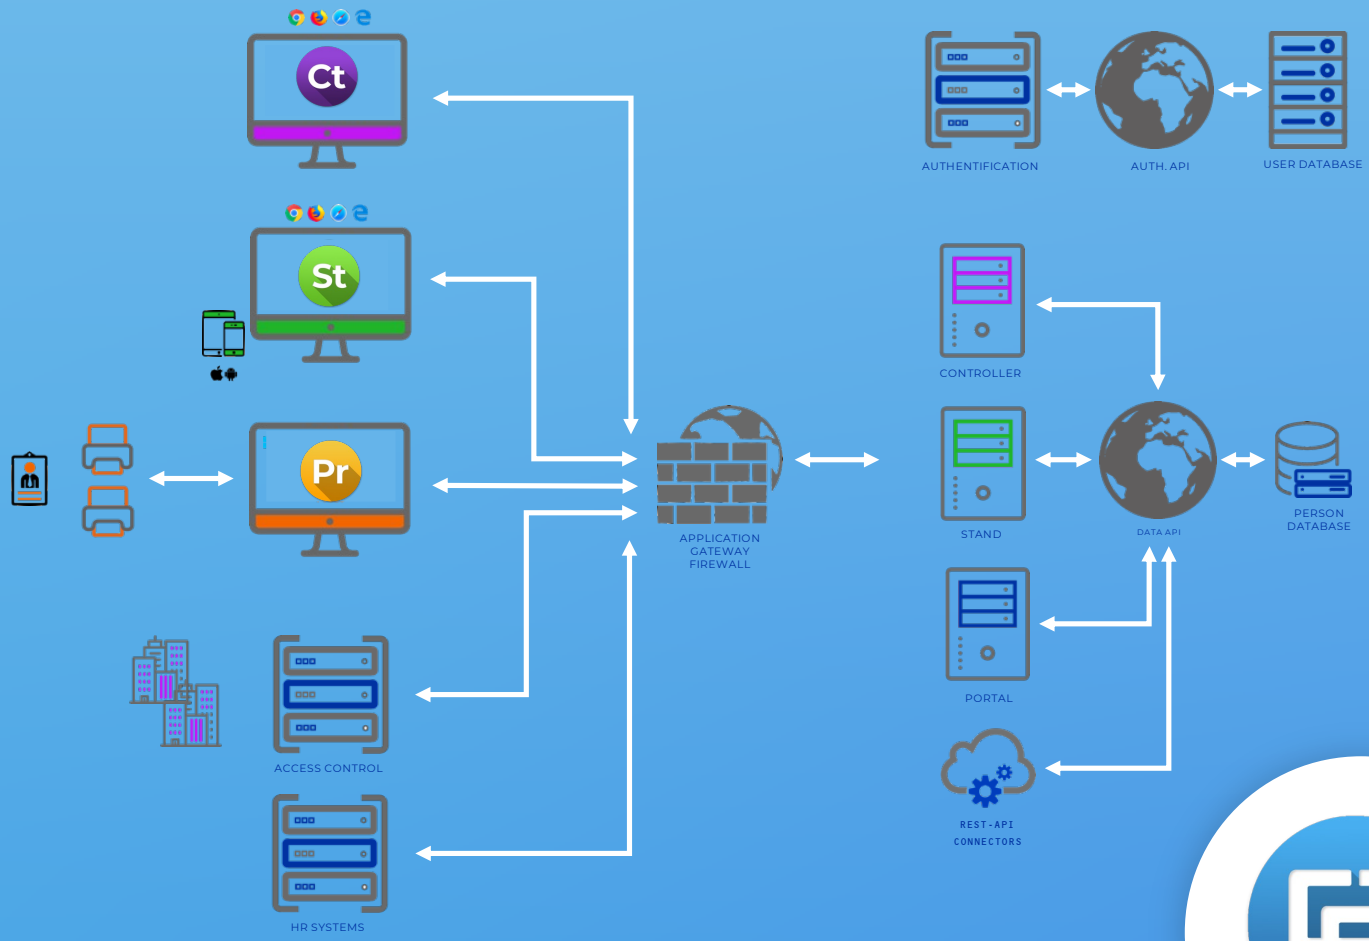


System Architecture

CLOUD SUITE

PLATFORM INTERGRATION

- Authentication
- Application Services
- Application Gateway and Firewall
- Application Clients
- Back Office Reporting



CLOUD SUITE SECURITY

- Transparent Data Protection
  - Adheres to GDPR for top-level personal data security
  - Ensures data is stored in isolated, secure locations
- Secure User Authentication
  - Uses IdentityServer4 for robust access control
  - Offers flexible login options with familiar accounts like Microsoft, Google, and Facebook
- Encryption of Data in Transit
  - Protects data using TLS protocol during cloud transfers
  - Ensures data security and integrity while moving
- Transparent Data Encryption
  - Encrypts database data in real-time using TDE
  - Uses strong encryption methods, seamless to the user
